ST. Y. GROWTH IN ORGANIZATION OF MUNICIPALITIES

Number of Municipalities in Alberta Has Grown From 47 to 212 Since 1905

FINANCIAL PROBLEMS OF NEW COMMUNITIES

Sixty-six Organizations Have Taken Place Under Recent Legislation.

The surprising growth of municipal organization in Alberta is strikingly shown in the annual report of the department of municipal affairs, which has just been compiled and which will shortly be issued from the press. In the eight years since the province was formed the number of municipalities has increased from 47 to 212. The comparison is as follows:

1905	1913
Cities	2
Towns	12
Villages	50
Rural Municipalities	66
Total	130

New Towns and Cities.

One new city was created during the year by special act of the legislature, viz., the City of Red Deer. There has yet no city act in force in the province, and each city carries on business under its own charter.

Only one town was incorporated during the year 1913, that being the town of Grondard at the western end of Lesser Slave Lake. This town has the distinction of being the most northerly town in the province, being situated in township 15, range 14, west of the 5th meridian.

The fact that only one town was incorporated during the year is largely accounted for by the amendments made to the Village Act, requiring a population of 200 before incorporation.

While this provision may reduce the number of villages asking for incorporation as towns, it will, it is expected, have very good results, as there was formerly a tendency for villages to become incorporated as towns and incur heavy liabilities before the future of the settlement was assured," says John Perrie, deputy minister of municipalities.

Financial Problems

In some cases very soon after incorporation on account of increased railroad facilities in the vicinity and other reasons, the population of the town, dropped back to a point which would not have entitled them to incorporation as a town if it had not already been granted. This state of affairs has a town in a very poor condition to carry the heavy burden of indebtedness which may have already been placed upon it in view of the expected growth.

As has been the case in the past and probably always will be the case, one of the greatest problems confronting our towns has been the financial problem. While it is quite true that this problem is likely to be always one of the main problems of our towns, a good deal can be done to prevent serious trouble by the town being very careful about assuming any indebtedness until the future of the town is definitely assured, and also to make sure that the improvements for which indebtedness is being incurred are absolutely necessary, and that they have an organization which will be able to handle the money borrowed as to get the best possible results.

Rural Organization

During the year six local improvement districts became rural municipalities. One local improvement district was absorbed by two adjacent municipalities, and five unorganized territories became rural municipalities. This made the total organized units at the end of the year, 147, 65 rural municipalities and 81 local improvement districts; the total increase in the organized area amounting to something like 15 towns.

At the last session of the legislature the local improvement act was amended so that there is now no provision for further organization as local improvement districts; the only rural organization being provided for being organization as a rural municipality.

The continued extension of railroads and the settlement of the country has led to the number of village organizations. During the year some 18 villages were incorporated as compared

PREVIOUS RUSSELL EXISTED AS WOMAN FIVE YEARS

Agata Szall, Attired in Overalls and Smock Appears in Court—Has Worked as Farm Hand North Dakota—Will Be Outfitted in Women's Clothes and May Be Deported.

Agata Szall is the name of a pretty Russian girl, little over 20 years of age, who professes to live the life of the male sex, to do a man's work, and see a man's world, rather than to do the rough and tumble of the male world in the customary attire of woman.

Agata has an honest face, and she wears honest looking clothes, namely, man's overalls, smock and coat, and a pair of trousers underneath the overalls. Her black, curly hair is cut short, man-fashion, and over it she wears a man's Panama hat.

For five years she has lived a man's life. First when she became tired of life in Russia, under its severe and sometimes cruel laws, she determined to come to America, the land of the free, and therefore donned an attire suitable to the occasion. Many clothes were her choice and attired thus, she had little difficulty in hiring one of the big liners and working her way to America, where she continued to wear her overalls, smock and coat, and the efforts of the local authorities are concerned, Agata Szall's life as a man, will be at an end.

GREAT REPUBLIC CELEBRATES DAY OF INDEPENDENCE

Evidence That July 4 Has Come Again Plainly Visible in Edmonton—Two Emblems Being Worn by Many Here—Picnic at Lake Wabamun Biggest Part of Local Happenings.

Even with hundreds of former Americans at Lake Wabamun, where the Canadian-American club of Edmonton ran a special train over the G.T.P., leaving the city at 5 o'clock, the celebration of the day was a very quiet one. There were many little Stars and Stripes in evidence on the streets of Edmonton this morning. Many former citizens of the United States wore small flags pinned to the lapels of their coats or on their hats. In some cases the flags were of the same size as the emblems of the United States, and were pinned to the lapels of their coats or on their hats.

In the great republic today take place the biggest national celebration of all the year. In a thousand cities and towns waves "old glory," the emblem of the "scorching eagle." There are speeches, parades, picnics, excursions and every other kind of celebration. In some cases the celebration is held on the beach of sunny California, and in every city, town and village—at almost every cross roads—baseball, the great American national game, is being played with 100,000 people eager, expectant, cosmopolitan people.

Although there are always a number of fatalities reported through accidents resulting from too careless celebration of Independence day, still the "glorious fourth" must be welcome to every American. Coming as it does at a time when out-door holidays are the most welcome, when everything that grows into existence as soon as the date seems to synchronize with the ambitions and aspirations of the people.

There is a time when the "glorious fourth" may be the rule, but it hardly seems possible that, as long as the present systems of celebration exist, the celebration of July 4 will ever be any less hearty and patriotic than it now is. The United States has given the world a great deal of good things. Perhaps had it not adopted the particular form of government it has adopted, it would not have been able to do so much for the world.

Most of these villages are along the line of railroad construction and came into existence as soon as the railroad began operation. In fact, in some cases it is noted that the village came into existence before railroad construction commenced. The surrounding country had been settled ahead of railroad construction, and as soon as transportation was assured villages grew up almost at once at different stations along the railway.

HILLCREST MINE FIVE BOSS SAYS WAS NOT DUSTY

Declares That He Found Nothing Indicative of There Being Danger.

PLENTY OF MOISTURE IN DISTRICT COVERED

Saw No Caves and Never Heard of Sparks Having Been Caused by Caves.

Hilcrest, July 4.—Donald Briscoe, fire boss in the Hilcrest mine for three years and a half, was called this morning at the opening session of the official enquiry at 10 o'clock. Mr. Briscoe was in the mine up to ten o'clock the night previous to the explosion. The mine was not working during the time he was in, but he made an examination of the main road and small pits in the south entry. The barometer, according to official report, indicated 29.54 normal barometer—the gas was not by any means an unusual amount, but as required, he posted the notice outside the mine at the warning board. The dust was about normal and the heat was nothing unusual, while there was plenty of moisture all over the district he covered.

He had experience all his life in similar mines, and he considered ventilation of the mine good. There had been no trouble to his knowledge with the system of ventilation, the fact being powerful enough for the workings as they are. During his descent he had experienced nothing indicative of danger and as a miner he would consider the mine run in a careful manner in regard to safeguarding the lives of the miners.

"If I was talking to other miners as to the condition of the mine in regard to dust, I would say it was a 'dusty mine,' he said. There had been some shooting in the mine during the afternoon shift and he swore to the fact that there had been no mis-shot. He saw no caves and during his employment there he had never seen any, he being mostly in the light workings.

During his experience in this mine he never heard any of the miners remark that sparks had been caused by any cause.

"At the session of yesterday the coroner's jury met and adjourned the inquest until July 21 at 10 o'clock. Mr. Campbell was put for the crown.

BOMB WRECKS BIG NEW YORK TENEMENT, AND FIFTY PERSONS DEAD

New York, July 4.—A six-story tenement house of 102nd street and Lexington avenue, collapsed today.

All available ambulances in the city were sent to the scene. Many persons were injured. Because of the confusion it was difficult to get an estimate of the dead. A chance passerby in the street was decapitated.

Eight bodies were recovered. Preliminary police estimates placed the dead as high as 50. The building was so badly shattered that the police attributed the explosion to a powerful bomb.

TURKISH TORPEDO BOAT SINKS TWO SHIPS WITH GREEK REFUGEES ABOARD

London, July 4.—An exchange telegraph company's dispatch from Athens today says a Turkish torpedo boat torpedoed and destroyed two ships filled with Greek refugees and also a bombarded the Greek port on the island of Gouli.

Car Conductor Injured.

Conductor Hildison, running on an east end route on the Edmonton street railway, was injured this morning when replacing a trolley pole to the wire. The pole suddenly slipping off the cable, then Hildison, who had hold of the rope to the ground, losing his back and head. He was taken to the south side hospital in Connelly & McKinnley's ambulance.

British Columbia Election.

OWEN Sound, Ont., July 4.—Advices received here today are to the effect that a provincial election in British Columbia is talked of for August.

LADY CHURCHILL'S SUIT AGAINST SONS ROUSES LONDON

London, July 4.—Much interest, and curiosity as well, is being shown in the suit of Lady Randolph Churchill against her sons, her purpose being to determine in a court of law her right, under the terms of Lord Randolph Churchill's will, to advance money to them, which was collaterally mentioned in the will.

The court decided against Lady Churchill, but so much mystery was attached to the action that none but those intimately connected with the case are able to understand it to full satisfaction. It is admitted that the most any outsider can do is to guess at the extent to which several Churchills to whom the advance money was referred by the decision are mentioned such prominent persons as Winston Leonard Spencer Churchill, John Strange Spencer Churchill, Randolph Frederick Edward Spencer Churchill and the children—all minors—of a number of other members of the Churchill family.

Mr. Justice Sargent, who heard the suit, referred in his rulings and decision merely to the testator, beneficiary, sons, widow, etc., omitting all other names.

It was obvious from the outset of the proceeding that it had been arranged to preserve the utmost secrecy and to keep "what was the Churchill's for the Churchill's." When Lord Randolph Churchill died he left a will bequeathing the enjoyment of his real and personal property to his widow while she remained unmarried, and later to his two sons and their children. One of the executors and trustees was Lady Randolph Churchill.

The high arose as a result of Lady Churchill's marriage to George Curzon, which was later annulled, and she instituted her suit to determine if she was entitled to have her back the right to hand over the properties and draw on the resources. The whole proceeding was obviously technical, and Justice Sargent's decision is construed as being "in accord with the spirit of the will rather than the letter of it."

The Justice's decision was to the effect that Lady Churchill, by her second marriage, had lost the right to hand over the estate of her first husband or derive any benefit therefrom.

FINANCIAL NEEDS LOOMED LARGE IN COUNCILLORS' EYES

Most Important Problem Facing Alberta Civic Authorities in 1913—Abolition of Bonus Policy Has Helped—Legislation Has Tended to Check Financing on Over-Optimistic Scale.

Several important features of municipal organization and civic life in Alberta are dealt with in an interesting manner by Mrs. Perrie, deputy minister of municipalities, in his annual report to the minister of the department, Hon. Wilfrid Garripy, which has just been prepared.

"The year 1913," says Mrs. Perrie, "was a year of great progress and development in municipal affairs in this province, more particularly in regard to rural municipal affairs as it was the first year that rural municipalities, which were organized in the year 1911, came into existence in December of that year and carried on business for the first time during the year following year. As was to be expected, these organizations had to meet and deal

BELIEVED LIGHT FLOOD OVERFLOW FROM UNDERNEATH

Dingman No. 2 Stated to Be Nearer Apex of Anticline Than First.

DOZENS OF COMPANIES CONTRACT FOR RIGS

Rise in Price of Athabasca Oils Causes Activity in Adjacent Stocks.

It is now believed generally, and confirmed by geologists, that beneath the light oil which gushes from the Dingman No. 1 well in the Calgary field, there is an immense body of the heavy product. Among those who declare this to be true is Andrew Larion, of Vancouver, one of the geologists of note who have recently paid the field a visit. It is said that the light oil is a kind of seepage from under.

It is also stated that the Dingman gusher is not by any means the best well which will be discovered, even in that field. The Calgary Petroleum Products company, which is the name of the concern which owns the producer, has started another well, known as Dingman No. 2 and it is stated that No. 2 is nearer the apex of the anticline than is No. 1; also that several of the other companies now drilling are nearer it than Dingman No. 1. Drilling is going ahead as fast as possible in most of the wells, while in dozens of other cases the apex of various kinds and sizes have been ordered, many of them being on the ground. The Union Pacific is the only company so far reported to one. One well, the diamond drill, which does very fast work, but several of the new concerns are understood to be about to use the modern method also.

Forty Feet of Shales.

It will be remembered that the Monarch well, which is located west of Olds, struck heavy, black oil at 88 feet. Many have been asking recently why the company continued drilling if the oil were really struck. However, it appears that a contract was let in the first place to go down 1,500 feet, and the company is taking advantage of its contract and will drill that depth to see if any further shales are encountered, as it is stated a layer is not less than 40 feet from the top to the bottom, while no one can tell how far it extends, although it is believed to cover a very large area, comparatively, because of the nature of the oil brought up and the geological formations of the district.

In Edmonton the several northern fields are almost challenging the two southern districts, where oil was found in both cases, for the position of importance in the eyes of the people. The Maritime Petroleum company is drilling in the Wetaskiwin, Birch Lake or the Athabasca, which has given a drill of all to the city, with the single exception of the drill Campbell bore large holdings in all three and is within the limits of the city, on its southeast side.

Activity in North

Although no company is reported as having started actual drilling operations in the Wetaskiwin, Birch Lake or the Athabasca, which has given several companies with solid, conservative business men at their back, have been very active in the north, and are actively preparing to begin development work.

In the Fort McKay district the Athabasca Oils, limited, in which Cunningham Craig and Mowbray-Leslie are now heavily interested, has four wells down, three of them producing.

Two other companies with local directorates, the Fort McKay Oil and Asphalt company, and the U. S. Oils, limited, look very promising, the former having already started drilling operations. These two concerns have extensive holdings on the same anticline of the Athabasca, which has given in the last week from \$1 to about \$2 per share. The U. S. also has leases in Rose Shillington and the Nakamun districts.

It is believed that there will be great activity in the very near future in the Birch Lake district, where very large areas have been filed on within the last month. Alberta Insurance Co. has been active in the district, as well as the Alberta Paraffin and other local companies have holdings there, as well as some of the foreign firms.

The first issue of stock in the Bonaville Oil company, limited, goes on the market early in the year. The company was organized in the office of York and McNamara, 41 Jasper avenue west.

Estate Goes to Daughters.

Hamilton, Ont., July 4.—The late Senator Oliver, of Beauséjour, left an estate valued at between \$500,000 and \$600,000. After the death of his widow the estate is to be divided equally among his five daughters.

Deck's Foundry Burns.

Bolton, Ont., July 4.—At 2 o'clock this morning fire broke out in Deck's foundry here, and before fire engines arrived \$12,000 damage had been done. Insurance \$5,000.

(Continued on Page Three)

FINANCIAL NEEDS LOOMED LARGE IN COUNCILLORS' EYES

(Continued.)

with many problems. Many of these problems were of course, problems which arose out of the organization of a new organization, and were practically problems that belonged to the municipality of the organization. It might be pointed out, however, in this connection that municipalities will always have new problems to face from time to time, and this condition of affairs will always exist as long as a municipality is making the progress it should make, and it can be taken as an indication that any municipal government which does not find that it has new problems to deal with from time to time is not making very much progress.

Remarkable Results
"The first year of organization in rural municipalities must of necessity be largely a year of preparing for work rather than a year of doing work, and therefore, the record of our rural municipalities for the year 1913 cannot be taken as an indication of what can be accomplished by rural municipalities, yet the progress made by our rural municipalities during the year 1913, was very satisfactory, and it is a safe prediction that these organizations will become a great factor in the development of the province. The good results that have followed rural municipal organization after one year's trial are very remarkable when we take into consideration the fact that the act under which these municipalities were carried on business last year was new legislation and that the areas included

within the boundaries of these municipalities were areas that had not before been grouped together, and that many of the ratepayers were strangers to each other, strangers to the country and to our forms of government. When the elections become better acquainted with the laws under which they carry on business and with the best methods of obtaining results from the organization there will, no doubt, be splendid results from this system of local self-government."

Progressive Spirit.
Mr. Perrie comments on the energetic and intelligent manner in which the councillors of the newly organized municipalities are taking hold of and dealing with their problems. He says further:

"As long as municipal problems are approached with the right spirit there will be no trouble in making progress, and with the elections taking an active interest and seeing that their best men are elected as councillors there is no fear of the outcome. The great success of our rural municipalities is the fact that the electors of any municipal organization are the electors of the municipality live up to their opportunities and their responsibilities. It is to be hoped that the electors in our rural municipalities will not fall short in this respect, and if they keep in touch with their municipal affairs and exercise their franchise properly there will always be good results. In aiming at good results in rural and municipal work, it might

Thinks Swearing All Right

Providing the provocation equals the offence of Jones stepping on Smith's corn. Par better, however, than the Corn Extractor—It does cure corns and warts—in one day without pain. Try "Futnam's," free from acids, and painless, price 25c. at all druggists.

he well to point out that these results do not mean results in the shape of roads and bridges only, but results which will help to provide for the health, safety and general welfare of the people.

Financial Aspect
"With reference to our urban municipalities, the great problem during the past year in many cases has been the problem of financing the business of the municipality. As a municipality is, of course, a spending organization the financial question is always one of its big questions, but during the past year on account of the general financial depression, rather more difficulty has been experienced in meeting obligations than for some time past. The danger which our municipalities must guard against in connection with this is the danger of their going too far in incurring liabilities to provide for the future. It is firmly established in a new country, as ours is, it is difficult to estimate what the future of a town will be, and it is wise for a municipality to be conservative in contracting liabilities until conditions have become so settled that it can be fairly predicted that the future of the town is likely to be.

If because of the opinion that there is a great future in the future, a town, large indebtedness is incurred, and then the expected growth does not follow, the result is that the ratepayers of the municipality will have to assume much too large an indebtedness in proportion to the population and the business carried on, resulting in a bad condition of affairs all round, and the town is likely to lose the future growth which it might otherwise have had if financing had been carried out more carefully. As well as the loss frequently caused by over-estimating future growth, there is also very often a danger of loss through towns incurring liabilities to go into municipal ventures that are of a speculative character.

Bonsuving Prohibited.
"Another feature of poor financing is that of being guaranteed against the loss of long term to cover improvements that will have disappeared long before the debt has been paid. Sometimes in the past municipalities have also got into debt through a desire to home some industry that they thought would be of great assistance to the municipality. This system of housing industries has, however, so frequently proved to be a detriment to the best interests of the municipality and has resulted in giving the municipality a heavy debt without any benefit, that the legislature has seen fit by provisions in the Rural Municipality Act, Village Act, Town Act and all the different city charters, to prohibit any municipality from granting a bonus of any kind to any industry. This may seem like rather arbitrary action, but I think the results will be in the best interests of the municipalities."

PARISIANS ARE SUFFRAGETTES, BUT OH, SO DOCTILE

They Are the Sweetest Creatures Imaginable, but Still Want Vote.

Paris, July 4.—The Parisian suffragettes are just the sweetest and most docile creatures imaginable, but she wants the vote. When she said so the skeptics laughed, largely because she behaved with becoming modesty, and when the handsome gentleman told her she must not demonstrate in the streets, she went quietly home. And people thought she was not serious, but a test just made by a newspaper proves that this belief was a mistaken one.

Women of the wealthy and middle classes regarded the plebiscite as a joke, but the votes of workers in the industrial and mining districts carried their votes with great enthusiasm. No fewer than 300 letters were received wherein three generations in one family, grandmother, mother and daughter—announced their desire for the vote. In thousands of cases mothers with three or four daughters expressed their wish for the suffrage.

Saturday was the closing day of the test vote and the offices were besieged by postmen and women. The former were laden with letters and the latter attended to record their votes in person.

Although an extra staff was engaged in counting the votes not one-third of the letters received were recorded. The results to hand show that 46,194 women voted for the suffrage and that only 107 were against this reform. Pretty Parisiennes will offer anything for fashion and I imagine there were many little arched ankles when the prevailing still-lace shoes are put to rest for the night. As you walk along the boulevards you see charming women tripping along with mincing steps, obviously not enjoying their promenade one bit. But fashion decrees that they should wear shoes with heels three or four inches high. They walk for all the world like ballerinas tilted on their toes.

When Queen Mary was here she expressed surprise that fashionable Frenchwomen could go to such extremes and maybe the announcement of this fact is the cause of the striking attack made by the well-known Dr. Pierre Juvenet, in whom I walked this day.

"High heels are as irrational as the corsets which the faculty has condemned in the name of health," said the doctor. "Exaggerated heels distort the natural functions of the feet, just as much as the old-fashioned corsets pinched the digestion and impaired the liver."

London consumers' eggs valued at \$11,629,000.

NATIONALITIES OF MEN WHO PERISHED IN HILLCREST MINE

The following summary of the nationalities of the men who lost their lives in the Hillcrest disaster has been supplied to Premier Sifton:

Nationalities	Single	Married
Canadians	14	13
Americans	3	1
Swedish	1	1
English	21	22
Scottish	15	11
Slovak	2	2
Hungarians	2	2
Ruthenians	2	2
Ruthenians	15	11
French	4	3
Belgians	2	2
Italians	24	11
Foreigners, unknown	1	3
Total	101	88

It is rather a striking feature that of 189 men who perished the oldest was 45 and all with the exception of 11 were under 40 years of age. A similar disaster in other countries would probably have revealed the fact that half the men employed were over 35 and one-third over 45.

DREAMS SHATTERED: DIVORCE IS REFUSED

Los Angeles, July 4.—Dreams of being the possessor of a new position, a fine touring car, fine clothes and an income with which she could satisfy all her desires were related in Judge Moore's court by Mrs. Lillian Silber, twenty and pretty. When these dreams evaporated after a month's married life, during which she received but \$2.35 for herself, Mrs. Silber quit her marriage to Herman A. Silber, a chauffeur, on the ground of fraud and desertion.

SPECTER OF HIS VICTIM BRINGS KILLER'S DEATH

Detroit, July 4.—Haunted by the ever-recurring phantom of a man he killed in cold blood twenty-four years ago, Tom Holmes, Todd, fifty-eight, found that, though the accidents of the courts had not taken an eye for an eye and a tooth for a tooth, society at the latter end exacted the even penalty of a life for a life.

Tom Todd tried to walk the "street called Straight" during the last ten years. He faced the world as an honest man in Kansas City. But ever at his elbow stalked the memory of the red thing he had done and never could forget.

To escape the phantom he leaped to death from a high building.

Home From Calgary.
Miss Florence Hollick, supervisor of domestic science in the Calgary public schools, is home for the summer vacation at 170 Sinclair street.

MANY WOMEN COMMIT SUICIDE NOW IN GERMANY

Self-destruction and Feminism Seem to Develop Near to One Another.

GREATER BERLIN GROWS AT MUCH SLOWER RATE

Prince's Approval Seems to Make a Song Perfectly Decent.

Berlin, July 4.—The German military authorities have adopted a novel twist of the solemn principle as a preparation for the next war. Limiting the example of those countries that do not admit shipwrecks to convert them into naval vessels in time of war, the German war office has for about a year been paying subsidies on heavy armaments of war, which the army will take over by regulation as soon as a war breaks out, so far as the military authorities are concerned, however, goes much further than mere: to have a certain number of such trucks at hand which may be requisitioned by the army to get them so generally introduced that the armistice can find them anywhere in the country. The military authorities are so well satisfied with the system that they have just decided to increase the subsidies and to extend them to all warships. They had hitherto only been paying them for five years. Hitherto the total subsidy for five years on an automobile with one trailer was \$1,875 while hereafter it will be \$2,045 for five years.

The development of the woman's movement in Germany carries with it a remarkable increase in suicides by women. The rate of suicides of men remained constant during the 20 years ended with 1912. The number of women suicides increased from 82 to 107 per 100,000 of the woman's population. While there are doubtless many causes for the increase, the chief cause is undoubtedly the fact that women have gone into workshop and factory, mercantile employments and the professions much more extensively than 20 years ago. They have shouldered larger responsibilities and have exposed themselves to greater economic and social dangers. That the cause is largely an economic one is evident from the great increase of women suicides at Berlin where nearly 10 women take their own lives to every 100 men.

Men who have passed the crown price and his family cannot be indicted. At least this appears to be the rule of law from the conduct of the state attorney in an action against a Berlin music publisher. The action began with the confiscation of 15 songs. The prosecutor contended that each of these was indecent and a violation of the law concerning obscenity.

The defendant's attorney set up that 10 of the songs had been sung at a special performance in the palace before the crown prince and other members of the royal family by a cabaret performer. These 10 were thereupon released, but the court upheld the confiscation of the other five.

The population of Greater Berlin is growing at a slower rate since the present period of business depression set in. It increased last year by only 50,000, whereas the gain had been 100,000 for 1912 and 110,000 for 1911.

Berlin itself actually lost population in 1912 for the first time in very many years. The reduction was about 15,000 whereas the previous rate of gain had been about 12,000 a year. That the change in property was the cause of this movement in population is evident from the fact that the number of persons in Greater Berlin employed as menials as 25 per cent was reduced in 1912 by 15,000.

Perguson May Leave Vacancy

Ottawa, July 4.—It was reported here last night, but could not be confirmed, that G. Howard Ferguson, M.L.A. for Grenville, has offered to resign his seat in favor of Hon. Dr. Roame, Ontario minister of public works, defeated in the recent election.

TOO LATE FOR CLASSIFICATION.

ONE SUITE FIVE ROOMS AND BATH IN new brick house in west end, but very reasonable. Choice location. Apply 187 Jasper Ave. West, Debon & Co.

4 STALLS, FLANK FLOOR, DRIVING school, and water. 1251 N. 1st St. Phone 7141.

1000 FEET TO LEASE \$500 PER YEAR. In three New Orleans lots. Will sell one lot for three had cash. \$2,500 each. Apply 1012 1st St. N.W.

REFINED, MIDDLE AGED ENGLISH LADY requires position as housekeeper in gentleman only thoroughly efficient. Apply Mrs. W. 1211 1st St. N.W.

WELL TRAINED "GIRL" CORNER IN new View 1044 134 14, Buck 11 for first year payment on home and lot in West End. Apply 179 1st St. N.W.

WANTED—PIANO, BY RESPONSIBLE party, with piano and pay cash for use of same. Phone 7141, 1251 N. 1st St. N.W.

WILL TRADE HOME AND LOT IN Seventh street, south of C.N.R. in P.M. R.R. Co. lot Block from Jasper. Will accept \$2,000 worth of clear title property in full payment. Apply Box 174 Capital.

WILL TRADE 40, 48, OR 51 ACRES ON Jasper west, and accept house and lot or clear titled city lots or farm lands as full cash payment. Apply Box 174 Capital.

Raincoats That Women Will Speak For Early at \$8.98

IT ISN'T A CASE OF RAINCOATS being indispensable because no woman would argue that point with the brand of unweathered wear we've had a taste of in the last few weeks, (trousers, though, is a material consideration of much importance to the average woman and that's why we see a hasty exit of these brave waterproof raincoats in the early hours of the business day Monday.

Paramatta is the Material— Wearworthy Paramatta!

Wright's feature with cashmere finish, all seams are sewed and reinforced, every garment is guaranteed waterproof. They are fashioned with Raglan and set-in sleeves and finished with shield at cuff, buttons up at wrist. Colors are tan, brown and olive. Sizes 34 to 44. Monday, Special \$8.98

Underkirts that Were High as \$15.00, Special \$3.95

Such beautiful silks as Milano, crepe de chine, silk satin Messaline, grove silk and Grove Milano, every new shade—mauve, champagne, royal amethyst, cerise, paddy green, tango and also black and white. Underkirts that are precise in cut and fit and clever in finish, appealing to most conservative women of dress. Regular values \$15.00 to \$15. Monday, Special each \$3.95

FLOOR TWO.

The "Chas. K. Fox" Imprint on These Women's Pumps Priced Down to \$3.95

OF COURSE THEY WEREN'T always \$15.00—because they're Famous "Fox" American footwear and couldn't be imported over the tariff line and yet be sold at that low price right here—larger and better value than planned to start the week aright even though we lose profits to see the shoe shops prosper.

Women's Pumps in Plain and Colonial Styles

In gummat and patent calf leathers, Recede and short vamp lasts, turn soles, Cuban and Louis heels. These goods are made by the largest and best known maker in America (Chas. K. Fox), Haverhill, Mass. Regularly priced to \$15.00. Special \$3.95

Ponder, Men---for one Hour \$5.00 and \$5.50 Oxfords Travel Out at \$3.45

10 to 11 A.M. Monday
SOMEtimes AN HOUR ONE day or the other doesn't seem to matter much to a chap—but it does when he's aiming to catch the "Overland Express" or bound for a Hudson's Bay store. This is the week when this one will be. It looks up to us as if a man could do worst than be here on the stroke of ten Monday, for there are

Only 35 Pairs Included

In this event. There's a fit, too, for a goodly many of men, and styles they'll like—just "you see the wear" when the 35 pairs are exhausted! Men's new tan calf Oxfords regularly \$5.00 and \$5.50. In 10 to 11 A.M. Monday, per pair \$3.45

—MAIN FLOOR.

An 8.30 a.m. Rush Will Follow This News of Women's House Dress- es at \$1.00

DON'T LET YOURSELF THINK that you'll find choice in these at almost any time of the day Monday, for we're pretty sure you won't—when one takes a second glance at the price—an even dollar! Not but that there's nothing to be said for it, and this one will be. It looks up to us as if a man could do worst than be here on the stroke of ten Monday, for there are

House Dress of Percale and Gingham

Fresh and crisp in style as the new dollar bill that buys them! These are made of good quality gingham, 3/4 sleeve, low neck collar. They are all neatly trimmed with lace or embroidery. Colors blue and white, brown and white, tan and white, black and white. Regular \$1.50 to \$1.65; sizes 34 to 42. Special \$1.00

LATE SPORT

LATER WINNERS
IN ATHLETIC
CHAMPIONSHIPS

London, July 4.—Homer Baker, of the New York Athletic club, carried off the half mile championship in the splendid time of 1:21.2. A. C. Hill, Polytechnic Harriers, was second, and R. F. Atkinson, Cambridge University, third.

Baker won by two yards, his time being the record for these championships, and only 2.5 seconds out-aside the British amateur record. W. R. Applebaker, Polytechnic Harriers, the holder, retained his title to the hundred yards championship, winning in 10 seconds flat. C. W. Taylor, Surrey A.C., was second, and V. H. A. Drury, Polytechnic, third.

G. H. Gray, of the Salford Harriers, the holder of the title, again won the 120 yards hurdles championship; W. F. Potter, of Yale University, and the New York A.C., was second, and K. Howell, of Cambridge University and the London A.C., third. The time was 14.5 seconds. Wm. Oler, Jr., for the N.Y. A.C., won the high jump championship with a jump of 6 feet 2 1/2 inches.

B. H. Baker, of the Liverpool Harriers, the holder, jumped 4 feet 2 1/2 inches, and was placed second, while F. Simmons, of Princeton University, was the third with 5 feet.

C. N. Seddhouse, of the Blackheath Harriers, won the quarter mile, his time being 50 seconds. A. V. Mitchell, of London University, was second, and Homer Baker, New York, was third.

Clabby Beat McGorry.

Sydney, N. S., July 4.—Jimmy Clabby of Hammond, Ind., won tonight on a foot from Eddie McGorry, of Oshkosh, Wisconsin, in the title of the middle weight champion. The fight occurred in the eighth round. The battle was hard fought, but McGorry was not continuously. McGorry could accomplish little, however, against his adversary's superior skill. He tried repeatedly to land left hooks but each time was blocked. He was desperate when he committed his last effort. Much interest was shown in the fight and a great crowd attended. The contest was scheduled to go 20 rounds.

RICHES EARNED
PLAYING HOCKEY

Fred Taylor and Newby Lalonde Recognized as the John D's of Game

Fred Taylor is generally recognized as the John D. of the hockey arena. He has placed his hockey career on nothing but a smile and a lot of speed. Now they say he owns real estate in Ottawa, Vancouver, and Toronto, and can write out his cheque for \$20,000 any day. "Cyclone" received \$7,500 for two seasons' work as a member of the Newfrew team. He is said to be drawing \$11,000 for his services to the Vancouver team while the Ottawa also handed him a big stipend when he was a member of the red, white and black squad. Taylor is said to have saved every penny of his hockey earnings and quite a lot of other coin besides. His investments are secure, and he could retire at once and be absolutely independent of the game which made him the most talked of player in Canada. His Newfrew salary brings in records.

Foxy is "Newby"
The real Russell Fox of the hockey business, however, is "Newby" Lalonde. He is the prince of financiers. Lalonde began his career as a member of the Cornwall lacrosse club took him out of a printing shop at the factory where he placed him between the poles. He has jumped to Regina, to Vancouver, to the Irish-Canadians, Nationals, Canadians and others, and every team "Newby" made a move, but benefited him. In 1912 he pulled down just \$5,000 from the Vancouver Lacrosse club, then headed for Con Jones. He got \$3,000 from the Canadians in 1913, and his salary this year is reported to be \$20,000. "Newby" allows his admirers to do the spending, in which he is correct. "In a few years they won't want to speak to me, perhaps," he recently observed. "Then my money may come in handy."

Success Merited
Lalonde must have about \$25,000 added away, as he has been in the limelight since 1908, and has won it both ways from hockey and lacrosse. "Newby" is never accused of "throwing" a lacrosse game at the money, but the charge was absolutely false. Lalonde is strictly on the "level," to revert to hockey parlance, and any success he may have attained was well merited.

Henley Regatta.

Henley-on-Thames, July 4.—Harvard second eight captured the Grand Challenge cup by beating the Union Boat Club of Boston in the final heat. Harvard crossed the finishing line a length and a quarter ahead in seven minutes and 20 seconds. It was a magnificent race throughout. The Italian sculler finished alone in nine minutes, as Stuart had stopped just after passing the mile post. The Cambridge crew had to be lifted out of the boat and taken on board the umpire's launch. Giuseppe Sinigaglia, of the Larce Rowing club, Como, Italy, carried off the Diamond Sculls trophy by beating C. M. Stuart of Trinity hall, Cambridge, in the final heat. Leader saved the Stewards challenge cup for England by defeating Mayores rowing club in today's finale. The German oarsmen cracked and stopped, leaving Leader to finish alone in 7 minutes 55 seconds. The weather was fine.

French Auto Racing.

Lyons, France, July 4.—Thirty-seven French cars representing Italy, England, Belgium, France and Germany, started today in the race for the Grand prize of the automobile club of France, over a course of 46 1/2 miles. There were no American entries. The absence of the American team, following their recent defeat at Indianapolis by the French, was noted.

Is Tennis Champion.

Wimbledon, July 4.—Norman E. Brooks, of Australia, won the All-Comers lawn tennis single challenge championship today, wrestling the title from Anthony F. Wilding, of New Zealand, the holder, in three straight sets, 6-4, 6-4, 7-5.

SLIMLESS CITY
THE DEAL OF
40 NOTES

Would Establish Capital Devoted to Science, Art and Physical Culture.

Washington, D.C., July 4.—An idealistic project has recently been launched by an international organization known as the "World Science Society." The details and plan were conceived and perfected after ten years of labor by Hendrick Christian Anderson, an American-Scandinavian sculptor residing in Rome, assisted by some forty sculptors, artists, engineers, architects and scientists. He has for his object the establishment of an ideal world city where all international people are to have their home and inspiration.

A review of the massive and beautiful illustrations of the plan, which embody the plan in its details are published in the Monthly Bulletin of the Pan-American Union. This proposed international city is to be a city of light, health, wide avenues, parks, play-grounds, fountains, lagoons and noble buildings. It is to be a city without walls, a city of efficiency, convenience and beauty. Not only in structure, plan and equipment will it be the ideal city, but it is intended to become intellectual, artistic and practical international capital of the world; a clearing house for the various social, cultural, scientific and political aspirations of humanity. As designed it will cover some ten square miles of ground. Its architectural plans are so drawn that it can be built at almost any spot accessible to the sea that the nations may choose.

Science, art and physical culture are the three international divisions.

The scientific course is connected with the centre of art by the broad Avenue of nations, flanked on either side by palaces which will house ambassadors and delegates to their respective nations. It has for its crowning motif the granite Tower of Progress, 1,000 feet high.

The art centre is connected with the physical culture centre by means of a garden devoted to horticulture, natural history, zoology and botany. The physical centre is intended to facilitate a world reunion of athletes and to promote the scientific development of the human form in all nations. A vast stadium is its central feature.

The estimated cost of creating such a city, according to the author of the plan, would not be more than \$100,000,000, a sum that would not severely tax the resources of the governments of the world if equitably distributed. The international committee of the organization is to determine the site and location of the city at its meeting next year.

Numerous places have been mentioned, such as the Dutch coast near The Hague, the Lowlands, near Cannes; Turin, near Brussels; St. Germain, near Lyons; near Paris; the Marmora coast, near Constantinople; the New Jersey coast, near Lakewood; the isthmus of Panama, and recently the Island of Cuba.

New York, July 4.—(National) Errors by the local office of the city of New York easily defeated Philadelphia in the opening game of the series yesterday, 4 to 2. Demaree pitched his best game in weeks, and held the visitors in the seventh, brought Boston within one run of tying and even followed with a single, but local batsmen were unable to score again.

Fifty London, Eng., teachers are to visit Panama Canal.

ANOTHER ARREST
BY MEXICANS OF
BRITISH SUBJECT

George S. Douglas Perhaps Court-Martialed for Assisting Federals at Zacateca

INCIDENT DEVELOPS NEW COMPLICATIONS
Vice-Consul at El Paso Seizes Assurance Stay in Disposition of Case.

El Paso, Texas, July 4.—While the war factions of the constitutionalists are attempting to adjust their differences, the arrest and possible execution of British subjects in constitutional territory has developed a new complication.

James Calhoun, British consular agent at Zacatecas, reported yesterday that George S. Douglas, a Scotchman, was under arrest and about to be subjected to a court martial at Zacatecas on a charge of having assisted the federal forces in the recent fighting incident to the capture of the city by Villa's troops.

H. C. Miles, British vice-consul at El Paso, after consulting with both Carranza and Villa agents here yesterday, was under great stress and was disposed of the Douglas case would be made until Theodore Hamm, American consul at Durango, reached Zacatecas and investigated the affair on behalf of the Washington state department and British foreign office.

Nikolai Smith, 18, nearly blind, and unable to see to read, graduated in Wilkesbarre, Pa., at the head of his class in high school.

Canadian Loan in Demand.

London, July 4.—The last Dominion of Canada loan is in active demand, having risen to five-sixteenths premium. British Columbia is well supported. South Vancouver will shortly offer \$20,000 loan in five per cent at \$1.

Advances Growth of Crops.

Regina, Sask., July 4.—The present warm weather has rapidly advanced the growth of the crops in Saskatchewan, says the latest report of the agricultural branch of the department of agriculture.

The Alliance Oil Co.

LIMITED
The President of the Alliance Oil Company, Limited, returned from Calgary this morning where he has purchased another Oil Lease for the Company on the Anti-cline close to the Monarch Well.

These leases are being rapidly acquired by American and English Syndicates, so that very few are now available. The Eastern Canadians are also becoming factors in the situation, having acquired confidence in the Alberta Fields, owing to the recent strikes and to fuller knowledge of the conditions.

The Alliance Are Now Holding 6 Leases

Three of these immediately adjoin the Nakamun well,—one immediately adjoins the Williams, and two are on the anti-cline between the Monarch and Dingman Wells, so that the Company's property blankets the entire Oil Fields of the Province.

BRITISH BANKING BUSINESS IS FAST BECOMING 'TRUST'

New York Journal of Commerce Publishes Article Dealing With Situation.

CONSERVATISM IS
DISADVANTAGEOUS

Does Not Compare Favorably
With German System of
Nursing Industry.

New York, July 4.—The Journal of Commerce prints the following article on the London banking situation:

"There is an ambition among the big English banks to become the big banks of the world. This suggestion has been repudiated, but the repudiation was of the diplomatic kind. Those who are the latest deal in the banking world, which promises to give the London City and Midland bank, which is headed by Sir Edward Holden, pre-eminence when judged from the magnitude of deposits, is very interesting.

The London City and Midland bank, which absorbed the Metropolitan bank (of England and Wales) by an exchange of shares, and by this move the deposits of the former will approximate £155,000,000, or about £2,500,000 more than those of the City bank, which recently acquired the Wills and Dorell bank, an old established institution conducting a very fine business in the southern counties. With this deal the authorized capital of the London City and Midland bank will be brought up to £25,000,000, of which £22,944,000 has been subscribed and £4,789,000 paid up while the reserve fund, without taking into consideration the liability in respect of unrecalled capital, will be £4,000,000.

This concentration movement in the banking world is natural, but is being accelerated by the ambition of one of two parties. It is likely to continue. Nevertheless, it is not liked. In the first place, it is complained that the facilities to be obtained from these huge banks are not to be compared with those formerly obtained from the smaller institutions. In the second place, the personal or social element was a factor of importance. In the management of these big banks, the chief manager is of little importance, as he must, in the majority of instances, submit business proposals to the first instance for the consideration of the board of officers. It is, in fact, not given that scope for initiative as he formerly had, and no doubt that explains why the money lending business in this country flourishes so well. The English banks are too careful; they never take anything but ordinary risks and so they compare to great disadvantage with the big German institutions which nurse industry. In the second place the concentration movement places too much power in a few hands and really is the evolution of the "trust" system, now receiving such serious attention in the United States.

PREMIER ASQUITH AND OTHERS ARE VICTIMS OF HOAX

London, July 4.—A colossal but brilliant hoax, whereby the Premier and the Duke of Sutherland and 160 others prominent in the social and artistic life of London, were made to play roles as superni in a moving picture film, was carried through successfully in the small hours of this morning by that arch-foke, Sir James Patrick Grantville Barker, who will produce Barker's new play in the Grand Theatre, when the proceedings were finished, let the rest out of the bag.

The bait that lured the guests was an invitation from Barker and Barker to a "cinematograph supper in two acts" at the Savoy theater, beginning at midnight.

ARCHBISHOP SAYS LOW NECKED GOWNS ARE NOT DECENT

Kinston, Ont., July 4.—Archbishop Spence told the women in St. Mary's cathedral at this morning's mass that he would prefer that all those who wore low necked dresses would not present themselves for communion. That he considered it most disrespectful for them to approach the altar in garments that exposed them beyond the limit of decency. His Grace has on various occasions expressed himself against low necked dresses and skirts. A number of women who had intended taking communion did not do so as a result of the archbishop's admonition.

MILLIONS OF NEW MONEY FOR MEXICAN CONSTITUTIONALISTS

Washington, July 4.—Justice Anderson, of the district supreme court, signed an order last night directing three express companies to ship by train Monday why they should not be enjoined from delivering several million pesos in new currency engraved by the Mexican constitutionalists. The shipment is en route now to El Paso and the constitutionalists are said to fear that they will fall into unfriendly hands.

Battleships for Greece.
Washington, July 4.—Greece will turn over approximately \$12,000,000 for the battleships Idaho and Mississippi Monday, and the craft will be delivered to Greek crews at the Naval Station, Newport, Virginia, and the Idaho to the Mediterranean.

IN THE PARLOR CAR

Railway and Shipping News

American visitors to Canada often express their surprise and very hearty appreciation of the various kinds of service given by Canadian railways. Coming to this comparatively new country they expect sometimes to encounter trains, hotels and other facilities of a strictly pioneer nature, but those who come with these ideas generally go away with changed viewpoints. If they go back at all. The hotels owned and managed by the Canadian railways are generally of a high standard, both their summer and their winter in some of the dominion's great cities. A visitor from the United States, who stayed at the Chateau Laurier, Ottawa, somewhat after the style of which the Chateau Macdonald in Edmonton is being built, has written to the manager as follows:

"I recently had the pleasure of stopping at the Chateau Laurier and receiving from your room clerk the usual room card showing the number of my room and the rate per day. I note on the reverse side of this card a statement that if anything in connection with the management of your hotel was not satisfactory to call it to your notice. I am merely writing to say to you that it has never been my pleasure to stay at a hotel where I was treated with such uniform courtesy as I received while a guest at your house. I feel that the service was so pleasant and the service so excellent and the rooms so clean and the employees so courteous that I must congratulate you upon being able to operate such a splendid hotel."

Of the 52,213 shareholders of the Pennsylvania road 49 per cent. are women. The increase in the number of shareholders of the railways in the United States since 1904 has been 315 per cent. This shows the widespread interest that is taken by the people themselves in the railways of the country. It is also an argument for government generally in dealing with the railways in which so many of the people have invested their savings. The C.P.R. has something like \$5,000 shareholders scattered over the world. The management has never ceased to give the number in each country. It is known that many, Belgium and France the majority of the shareholders reside. Hundreds of thrifty French peasants have invested their savings in the C.P.R.—the peasants who paid the German war indemnity in 1871, and who say their prayers in spite of the scoundrels and the abrogation of the Concordat. It is the same in the other countries mentioned. It is the humble but thrifty classes who are found investing their money in the C.P.R., in which they are not only safe but comparatively free large holders. It is pathetic—the enquiries that are constantly being made by humbly from the other side—enquiries as to the general conditions of the company, what questions with respect to the dividend, and so forth. These are made for the most part by humble people, who have little acquaintance with business, but who, having a little money invested, are anxious when any sort of doubtful rumor reaches them.

Good progress is reported being made on the construction of the Pacific Great Eastern railway, which will link up the main line of the Grand Trunk Pacific at Prince George with the city of Vancouver. The Pacific Great Eastern is at the present time operating a suburban train service between North Vancouver, Perry Landing at Lonsdale avenue, and Dunbar, West Vancouver, a distance of five miles. Early this month they expect to extend this service to Horseshoe bay, about thirteen miles from the ferry landing. They are also at the present time carrying traffic between Squamish, at the head of Howe sound, and Chetum, a distance of about eleven miles. The track on this latter section is now being extended northward. Grading between the end of track and Lillooet, where the line crosses the Fraser river, one hundred miles north of Vancouver, is practically finished, but on account of unfinished bridging it is not expected that track will be into Lillooet before late in the fall of this year.

The entire balance of the line between Lillooet and Prince George is under contract, and it is expected that a force of 6,000 men will be employed to insure the earliest possible completion of the line. It is impossible to say yet when the line will be finished, although the engineers hope to have the line to Prince George graded by the end of this year.

On the Grand Trunk Pacific there is a run of 299 miles along the banks of the Skeena river—a torrential river, which has a great fascination for the traveler. One traveling millions of dollars had to be spent on this 299-mile stretch before the rails were laid. The shores of the Skeena will remain with him as a glided dream.

The Japanese are employed to a great extent on the western railways in the service of the traveling (tourists) and when any of their number qualify for the position of foreman none could be more loyal to the interests of the company. They do not merely offer eye service. They have a personal interest in the work; are careful and thrifty; get the work out of their men; and consider the service as though they had a pecuniary interest in it. At least one system—the Union Pacific—has printed instructions in the Japanese language for the benefit of its Japanese foremen, and the men under them. The Japanese would naturally take to lighter and more artistic occupations; but they excel in this, though they might not have originally liked it at all.

Steamer arrivals last night were: Quebec—Empress of Britain, Liverpool; Samland, Rotterdam.

Montreal—Victoria, Glasgow; Glasgow, Montreal.

New York—Adriatic, Liverpool; Carpathia, Trieste.

Paleria—Athina, New York.

Rotterdam—Car, New York.

Liverpool—Tunisian, Montreal; Virginian, Montreal.

Cherbourg—Imperator, New York.

Plymouth—Philadelphia, New York.

Tor Road—Lake Manitoba, Montreal.

Browhead—Montreal, Montreal.

Malinhead—Tontonic, Montreal.

Big storm cloud passes over city and does damage.

The hail storm which visited the city yesterday afternoon between 5 and 6 o'clock did more damage to gardens than to anything else. Especially in the east end, where the storm was the heaviest, garden stuff was blown down and in many cases ruined. The hail was accompanied by a 20-mile-an-hour gale, giving plenty of force to the hail and causing several windows to break; and some cellars to be flooded. Some pieces of hail an inch in diameter fell, and horses standing outside were injured, and many were seen to bolt down the street, or turn around in order to get their back to the hail. A few small signs and a couple of awnings were blown down.

The storm was limited to a comparatively small area, as reports from Nanton, Clover Bar, Horse Hills and Sherbrooke state the little or no hail fell, but warm rain. The fall of rain locally, and in the path of the storm, was recorded during one five minutes, as three-tenths of an inch, and at the Highlands observatory the rainfall was one and a quarter inches in 10 minutes.

A house on the south side, belonging to Mrs. Jane Schofield, near the corner of Fourth avenue north and Sixth street, east, was struck by lightning, but no serious damage resulted, although the fire brigade was called.

The falling of hail lasted in the neighborhood of 20 minutes to half an hour, and then a gentle rain, and following this a beautiful rainbow arched its way across the sky.

Good Harvest Predicted.

Moore Jaw, July 4.—A bountiful harvest is predicted by F. W. Green, secretary of the Saskatchewan Grain Growers' association. "The crop looks good," said Mr. Green, and "stable ground, well cultivated, will, in most districts, be a better paying proposition than summer fallow."

Refrain in 1912 sold the United States \$187,216 worth of thread.

TEN THOUSAND ARE REPORTED DROWNED MIDDLE WEST FLOODS

Canton, July 4.—Reports received here say that 10,000 persons have been drowned in the west river floods, which this year are worse than usual, and that deaths from starvation in the affected districts have been numerous.

The weather.

Fine and very warm weather has been general throughout the prairie provinces. A heavy rainfall is reported at Edmonton.

Forecast: Manitoba—Fine and very warm today, local thunderstorms reported at Edmonton.

Alberta—Local thunderstorms, but mostly fine today and on Sunday and becoming cooler.

Father Beaulieu Dead.

Montreal, July 4.—Perhaps one of the most learned and best known priests in French Canada passed away yesterday at the Hotel Dieu, in the person of Rev. Father Beaulieu, only brother of the Hon. Louis Beaulieu, and for many years parish priest of St. Louis.

REGENT OIL COMPANY LIMITED

Non-Personal Liability

Regent Oil Company Limited is strictly a "shareholders' company". It is organized for the purpose of reaching oil and paying dividends at the earliest possible moment.

Not only are its properties well located in the conceded oil area, but it has the splendid advantage of having both water and coal, and being within one mile of the railway. The leases owned are in the same neighborhood as Unity Oils Limited (leases selected by E. H. Cunningham-Craig) and near the Dome and Christie Wells.

Nearly five years ago Wm. Hutchison, A. M., I.C.E., in reporting on this property stated that on sections 5 and 6, T. 26, R. 4, W. 5., he found traces of oil on the land, and that as the property is located in coal measure and near an anticline, he considered this significant. In view of later developments and findings this report assumes great importance.

The Regent is incorporated for \$1,000,000, par value of shares \$1.00 each 178,333 shares of class A stock is now offered at par, each share carrying an option to purchase at par two shares of class B stock upon oil being struck in commercial quantities on any of the Company's properties.

Vendor's stock has been placed in escrow until 50,000 shares of Class A stock are sold, and vendors bind themselves not to sell this stock at any time under par.

Regent Directorate

President, The Hon. C.W. FISHER, M.P.P., Cochrane, Speaker of the House. Vice-President, F.M. GRAHAM, Calgary, Sheriff of the Judicial District of Calgary. Secretary-Treasurer: JOHN H. WILLIAMS, of Williams & West Auditors.

BANKERS: THE UNION BANK OF CANADA.

DIRECTORS

GEO. H. BURROUGHS, President Burroughs & Co. Ltd.
JOHN LYON, Broker
WILLIAM SAUNDERS, Publicity Manager, Henderson's Directories.
BERTRAM V. JACKSON, Pres. and Mgr. Director Jackson Water Supply Limited.

Vital Facts About Regent Think Them Over

REGENT has both coal and water in ample quantities.

REGENT has splendid acreage.

REGENT is organized on lines which encourage prompt development.

REGENT expects to bring in a producing well quickly.

REGENT at \$1.00 per share, each share carrying an option to purchase two additional shares when oil is struck, is a fine buy.

REGENT has a Directorate of which it is proud.

TRANS-ATLANTIC AIR TRIP TO BE FINANCED BY NORSE AMERICANS

Norwegians and those of Norwegian descent, living in Canada, and the United States are desirous to emulate the examples of their worthy ancestors and are raising funds to finance an aeroplane journey across the Atlantic. In common with the Norwegians in the old land they wish to see the Atlantic first crossed by a Norse aviator, as a Norwegian first crossed it in a boat—Leif Ericson.

In addition to aiding in the already large number of great things achieved by the Norse race, such a flight this year would be a most fitting way for Norse Americans and Canadians to aid their old country cousin in commemorating the hundred years of independence, for which a great celebration is now being held in Christiania.

The method they wish to finance is a very unique one—a way by which practically everyone may take part, whether rich or poor. Special cards of entering have been prepared and are being sold for \$1 each, which includes carrying it to Norway, the aeroplane which it is expected will be the first to cross the Atlantic. It is estimated that between 15,000 and 20,000 of these cards can be conveniently carried on an aeroplane, and that the cost of the strip and all the expenses will be defrayed by the trip.

The card is the standard post size and is as simple as a letter and contains instructions as usual. The flight will be made this summer in a Gien Martin type of aeroplane, and will take the following route: From the coast of Canada, via Greenland, Iceland, Faroe Islands and Shetland, thence to Bergen and Christiania, Norway.

Experts say that the route is feasible, the longest distance for continuous flight being 600 miles, or only about half as far as aviators often fly now without landing. The machine to be used can either start from, or alight on, the water.

Any information regarding the project and orders for cards may be obtained from the Edmonton office of the Norse of Norway: H. A. Anderson, 2115 Oxford street, secretary; or by S. S. Johnson, 601 Tegner block, phone 4812.

MORE HINDUS SAID ON THEIR WAY TO BRITISH COLUMBIA
Vancouver, July 4.—From a semi-official source it is learned that other rumors are correct. It was learned yesterday that a second steamer with 250 Hindus aboard left Hong Kong for Vancouver on Monday.

A cable which came by private sources through London was received to this effect. The second steamer is intended to carry passengers from Calcutta so that they may fulfill the regulations that immigrants must come direct from the land of their origin. It will be more than three weeks before the party can reach Vancouver.

The coming of the second party, that is, figuring that yesterday's information is correct, means Vancouver officials to make all possible inquiries regarding the source of the information. Some people in Vancouver go so far as to assert that German money has been put into the movement towards British Columbia for the purpose of fomenting trouble for the British empire in India.

Coming at this time after officials of the government had heretofore declined to comment on press dispatches quoting Minister Williams as having attacked Prime Minister William of Wied and his government in Albania, the action occasioned considerable comment. Although press dispatches reported that the minister had tendered his resignation, it had not, so far as could be learned, reached the department early today. Possibility of still further developments lent additional interest to the situation.

Philadelphia, Pa., July 4.—President Wilson requested the resignation of George Fred Williams, American minister to Greece and Montenegro as a result of Mr. Williams' public statements regarding the situation in Albania. This became known following the president's arrival here today.

HON. JAMES DUNSMUIR LOSSES MILLION AND HALF BY JUDGMENT

Vancouver, July 4.—Hon. James Dunsmuir, former governor of British Columbia, and the richest citizen of this province, loses a cool million and a half dollars in an adverse judgment delivered yesterday by the jury court in London. Four years ago Mr. Dunsmuir sold his coal mines on Vancouver Island to Sir William Mackenzie and Sir Donald Mann for eleven million dollars. The new owners claimed that they bought the interest in the bank as well as a couple of steamers used in the coal carrying trade between Victoria and San Francisco. Mr. Dunsmuir thought so little of this theory that a few days before the transfer occurred he declared a dividend to himself which wiped out the balance in the bank of several hundred thousand dollars. He also claimed that the coal mines alone were sold and not the steamers. The jury council has decided in favor of the new owners, with costs.

EFFORT MADE TO SMOOTH TROUBLE LONDON MILITIA

London, Ont., July 4.—Although all officers of the Sixth field battery of this city handed in their resignations following the dismissal of the commanders, Major Wood Leonard, as the result of the finding of a quantity of liquor in their tents at Petawawa recently, the resignations have not yet been accepted, and it is believed that an attempt is being made to smooth over the difficulty. Although the battery is now pretty well disbanded, it may yet be re-organized.

Echo of Clifton Failure.
Toronto, Ont., July 4.—An order winding up the Thomas C. Watkins Co. of Hamilton, a departmental store business, has been made by Mr. Justice Middleton at Osgoode Hall.

We're Ready for Another Week of Remarkable Value-Giving With a Daily Change of the Economy Bill-of-Fare

THE very goods the season demands are just what's being offered in this big mid-summer clearance event. And, although demand is still practically in the first flush of the season, we are already starting to think of a new season and all summer goods must now go. No matter what your summer quest may be you will find in this sale the goods you want and at such low pricing as the sterling quality of the merchandise would never have lead you to expect. Each day the economy bill of fare is changed—each day you'll find goods that cannot be purchased elsewhere at as low a price. Test the truth of our arguments by paying the store a visit.

A Surprise Value in White BEDSPREADS

at \$1.95, Regularly \$2.50 and \$2.75

THE surprise lies in their regular prices. Most women will look upon them as a bargain at their regular selling value, to say nothing of what the sale has lowered them to.

They are genuine summer spreads, too, in a nice light weight. In dimity stripe, fine flannel cord stripe and dainty brocaded designs. Pure white and full double bed sizes. Regularly \$2.50 to \$2.75. Sale Price **1.95**

Now for a Clearance of 75c to 90c Curtain Materials at 50c Yard
